DETAILED ACTION

Specification

1. The disclosure is objected to because of the following: On page 9, paragraph 00015, Table 1, Examples 2 and 8 are marked yes/no for suitability of material. This is confusing and the examiner is uncertain what the meaning of the "yes/no" is, especially since material of Example 8 is deemed suitable for the application while material of Example 2 is not.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 12, 17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The claims depend from canceled claim 2.

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claims 1 and 3-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brehmer et al. 4,717,496, Goldberg 6,475,619 or British Shoe Machinery Ltd. WO 94/03211, in view of Gaku et al. 4,820,769, Oien 5,525,663 or Lees et al. 2006/121225, with Reith 4,939,036 as evidence.

Art Unit: 1796

7. The rejections are maintained in view of the "Response to Arguments" set forth below.

Response to Arguments

8. Applicant's arguments filed 7/20/09 have been fully considered but they are not persuasive. The compositions of Goldberg and British Shoe Machinery do not require fabric. The compositions are applied to fabric. Applicants' claims do not exclude any operation taking place after the compounding of the hot melt adhesive is finished. Recycling the adhesive is not claimed. Anyway, the adhesives of Goldberg and British Shoe Machinery are recyclable, only the articles created after they are applied to fabric are not recyclable. The intended use is immaterial. The connection between Example 7 of applicants' specification and Brehmer et al. is not understood. If applicants' composition as described in claim 1 does not necessarily have all the properties needed for successfully practicing the invention, then it is applicants' task to define the inventive composition such a way that one of ordinary skill in the art could practice applicants' invention without undue experimentation. The way the invention is defined now in the instant specification; all formulations tried would have to be tested for MVR, surface stickiness, bonding value and longitudinal extension before it can be ascertained whether they are suitable for the purposes of the invention or not.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1796

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
